

REMARKS

The application has been amended herein in response to the International Search Report and the Written Opinion. The search discloses several references which were considered of particular relevance and the opinion stated that the claim did not have novelty or an inventive step based on these references.

The specification, claim and drawing have been amended herein to respond to the Written Opinion and to more fully explain the invention. Paragraphs have been added to pages 2 and 3 of the original application which do not add new matter but more fully expound on the existing specification. The structure of FIG. 3 has not been changed; but notations have been added to identify the structure and to more clearly relate the structure to the description already provided.

Claim 1 has been canceled and new claim 2 has been provided to recite the novelty of the present invention.

Respectfully submitted,

Oct 11, 2005
